Projects

Developer | TextUtils   August 2024-October 2024

- Designed and developed a dynamic web platform offering an array of text manipulation tools, including case conversion, text inversion, text-to-speech, and word/character counting, with a focus on user-friendly design and efficient functionality
- Optimized performance and user experience by implementing responsive design, real-time text processing, and intuitive navigation, significantly reducing manual editing time and improving workflow efficiency
- Conducted a user feedback survey with 50+ participants, gathering positive insights on the platform's effectiveness in enhancing productivity, with users praising its simplicity and time-saving features

Developer | NewsMonkey   April 2025-May 2025

- Designed and developed a real-time news web platform delivering the latest updates across categories like technology, sports, health, and entertainment, with a focus on intuitive UI and seamless accessibility
- Integrated real-time APIs, category-based pagination, and spinners for seamless and fast-loading user interaction
- Deployed a sleek, high-speed platform delivering real-time news with smooth navigation and user-focused design

Experience

Product and Tech Analyst | BookWorm   March 2024-June 2024

- Spearheaded the development of an innovative online platform for renting and selling books and novels, curating a diverse and extensive collection that catered to a wide range of interests and genres
- Launched the MVP through a WhatsApp group, effectively tapping into a niche audience and rapidly attracting over 30 active users within the first week, demonstrating strong initial traction and validating the concept
- Led and collaborated with a cross-functional team of 4 developers and 2 designers, overseeing the entire platform lifecycle from ideation and development to execution, while ensuring seamless feature integration, platform scalability

Product Manager Internship | its-time   November 2023-January 2024

- Conducted in-depth market research to identify key student demographics, pain points, and time management challenges, providing valuable insights to shape the platform's core features and user experience
- Collaborated closely with the founders to develop a comprehensive product roadmap, defining both short-term and long-term goals, ensuring alignment with the overall vision and successful product milestones
- Analyzed product usage data and key metrics to uncover user behavior patterns, leading to data-driven optimizations that improved student productivity by 20%, while also helping over 200 students within the first week of launch
