[My Portfolio](#)

JECRC  
UNIVERSITY

BUILD YOUR WORLD

## EDUCATION

B.Tech CSE (2023–2027) | **CGPA 7.7/10**

JECRC University, Jaipur

## TECHNICAL SKILLS

C++ , JavaScript (ES6+) , HTML5 , CSS3 , React.js , Node.js , Express.js , REST APIs , Git , VS Code , Figma

## PROJECTS

### NewsMonkey

(Feb 2026–May 2026)

- Designed and developed a real-time news web platform delivering the latest updates across categories like technology,sports, health, and entertainment, with a focus on intuitive UI and seamless accessibility
- Integrated real-time APIs, category-based pagination, and optimized spinners for seamless, responsive UI
- Deployed high-speed platform delivering real-time news with smooth navigation and user-focused design
- Developed reusable React components and optimized state management for scalable applications

### Sorting-Visualizer

(Oct 2025–Dec 2025)

- Built an interactive frontend to animate sorting algorithms using JavaScript and responsive UI updates
- Improved animation behaviour and visual consistency to make algorithm steps easier to understand
- Developed a responsive interface optimized for smooth browser performance across different screen sizes
- Implemented Bubble, Merge, and Quick Sort visualizations with animations demonstrating algorithm

### WhatsApp-Email-Server

(Jun 2025-Aug 2025)

- Built a configurable Node.js server automating messaging workflows, enabling flexible deployment, reliable communication handling, efficient backend processing, and seamless configuration management
- Implemented backend logic in server.js to support reliable, maintainable communication processing
- Organized project dependencies and runtime configuration to support scalable,efficient server-side execution
- Integrated IMAP email monitoring and Twilio messaging services for real-time WhatsApp notifications

## EXPERIENCE

### RHYTHM | Media Sector Manager

(Feb 2025–Mar 2025)

- Led a team of volunteers, overseeing participant coordination, guest engagement, and judge liaison to ensure smooth event operations.Managed logistics and communication to ensure all tasks were completed on time
- Directed media relations efforts, conducting interviews with bloggers and press to secure event coverage and enhance visibility. Served as the primary speaker, announcing results, boosting event recognition

## CERTIFICATIONS & ACHIEVEMENTS

- Maintained three production-ready GitHub repositories with documented code and deployment workflows
- Proficient in React Hooks, functional components, lazy loading, code splitting, and modern development
- Applied Agile & TDD methodologies, advanced Git workflows, branching strategies, and continuous integration
- Completed Node.js, Express, and MongoDB Bootcamp, building scalable full-stack web applications effectively

## LEADERSHIP & ACTIVITIES

- Coordinated cross-functional teams throughout the complete software development lifecycle and delivery
- Organized university-level events and delivered presentations to over two hundred participants successfully
- Contributed to open-source projects by submitting features, bug fixes, and technical documentation
